

MEEDER NEIGHBORHOOD

Fire Pit Operational Instructions

Step #1 - Locate post with grey timer box.

Step #2 - Lift cover up exposing the timer.

Fire Pit Operational Instructions (continued)

Step #3 - Check that the **red** knob is in line with gas feed line as shown in picture. Do not change if it is lined up as shown above.

Step #4 - Rotate **black** timer knob clockwise from the off position to the amount of time desired for fire pit to be lit (30-minute max).

Step #5 - Walk over to the fire pit.

Step #7 - Find the fire pit knob and igniter located on the side of the fire pit (see example pic below).

Step #8 - Turn knob counter-clockwise to “low ignition” location.

Step #9 - Push knob in and hold for 3 seconds, but do not release after counting 3 seconds.

Step #10 While still holding in the knob, push the ignition button that is below the knob. This will ignite the flames. Release the knob now.
