

New Birmingham HOA Exterior Paint Colors

The below Board-approved colors replace, but are similar to, existing colors which have been discontinued.

When repainting, use the new paint color that matches the original scheme of your unit (the “Description” color). *Exception:* Front door color may be selected from any “front door” color on the list. Front doors must be all one color.

The HOA has established a relationship with PPG Paints which provides a discount on their products to HOA residents. Products must be purchased directly at a PPG Paints store for the discount to apply.

Paint Types, per PPG recommendations: <ul style="list-style-type: none"> • Exterior, doors and frames: “Break Through”, satin finish (note this is a very quick drying paint for use on doors and frames, see PPG instructions for application methods) • Exterior, general use: “Sunproof”, satin finish
